

WELDRITE STRUCTURES LIMITED

SPECIALISTS IN STEEL
FRAME CONSTRUCTION

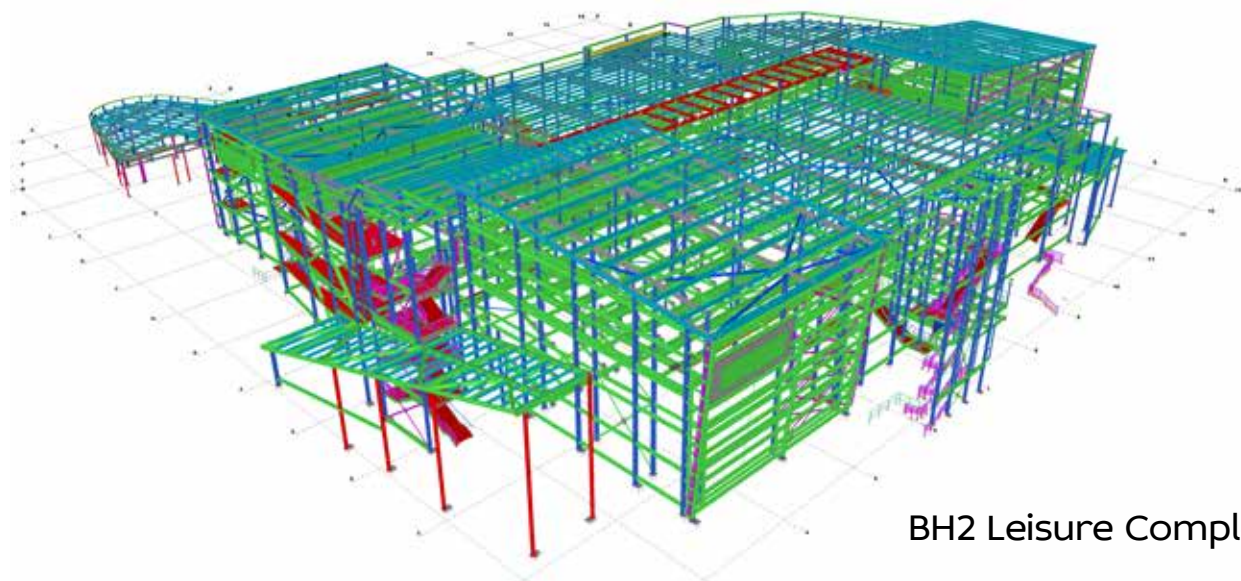

BH2 Leisure Complex - 915 tonnes.

About Us

WSL specialise in providing structural steelwork across all sectors. From small, bespoke structures to highly complex, challenging installations, we have the expertise required.

WSL have a passion for professionalism and we pride ourselves on delivering an unparalleled level of service. With decades of combined experience within the Steel Construction industry, we are able to offer our clients total peace of mind. From conception to completion, we deploy a collaborative approach, working closely with all parties to ensure a controlled route to final handover.

“Whatever the project, we are committed to delivering on time and within budget.”

BH2 Leisure Complex

Our Philosophy

At Weldrite, our philosophy is to offer a complete solution; a 'one stop shop' for all your structural steel requirements.

From concept and design right through to installation we can create a comprehensive package. We recognise and promote the need for a collaborative approach and have created an extensive supply chain.

Through this supply chain, and coupled with our special works division, we are able to offer a robust solution. From floor and roof decking, mesh flooring, balustrades to steel staircases we are able to incorporate our client's requirements into our scope of works.

Our combined understanding of the various critical elements, means our clients may relax in the knowledge that all the components are being managed by one contractor. The success of creating these relationships means that the various interface issues normally faced by our clients, have been dramatically reduced. Our flexible, supportive approach has proved instrumental in securing high profile projects.

Sectors

Since conception in the early 1980's, Weldrite have grown in size and strength, successfully completing projects across all sectors. Weldrite are specialists in complex works that need that extra care and planning. We cover multiple sectors, including:

- Health & Education
- Industrial
- Commercial
- Retail
- Refurbishment
- Residential
- Leisure
- MOD

Fleming Park - 700 tonnes.

Quality

Quality and its control is at the very heart of our business.

We understand the importance of delivering high quality, consistent standards throughout our processes.

From project design, fabrication and assembly, material traceability, project management and erection, we sign up to Industry Standard Accreditations to ensure our work is of the highest quality.

Weldrite adhere to the following initiatives so you can relax in the knowledge that all our steelwork complies with the latest European legislation.

- BS EN IO 9001 Quality Management System
- BS EN 1090 CE Marking Factory Production Control up to including EXC3
- SMAS Worksafe Contractor
- CHAS Contractors Health & Safety
- ISOQAR ISO 9001: 2015 Provision

Health & Safety

The Weldrite Group place our people first. We are committed to ensuring that satisfactory standards are maintained to fully protect our personnel, property and the environment against any potential risks.

Regular reviews are carried out to ensure standards are constantly improved and any potential risks are identified and minimised.

All Weldrite site teams are 100% qualified in their respective trade disciplines and hold the required industry standard certification including;

- SSSTS
- IPAF
- CSCS
- CPCS
- NPORS
- SMSTS
- PASMA

"Our teams will ensure an efficient and safe installation."

Design Coordination

As a group Weldrite are able to provide a fully integrated design service across all sectors of the market place. With a wealth of design experience we are able to assist our client's specialist teams, from conception through to delivery.

We seek to work closely with our clients from the outset, assisting in both technical and budgetary details. We believe in delivering 'added value' wherever possible and our design teams will regularly make recommendations regarding cost savings and programme enhancements.

Throughout the design process we encourage continuous dialogue, we give guidance on materials, fabrication and surface coatings right through to the erection processes. Making use of the latest 3D modelling software, Tekla / Trimble Structures we are able to take highly complex theoretical ideas and turn them into a reality.

Weldrite can offer anything from a comprehensive design and build package to a simple connection design requirement.

Project management & installation

Our dedicated team of Contract Managers recognise the needs and expectations of our clients. With years of construction industry experience, they will expertly guide the project through from pre-contract negotiations to the final handover.

At Weldrite we understand the unique challenges faced by each and every project. Our highly experienced professionals can seamlessly direct the project from design to complete installation. They are on hand to coordinate the on-site teams and trades, avoiding any costly delays or logistical issues, wherever possible.

We are committed to the efficient running of a project, without any compromise on health and safety. Indeed, Health & Safety is at the heart of what we do and our teams will ensure an efficient and safe installation. All site activities are documented and meticulously planned.

Comprehensive risk assessments, lifting plans and method statements are produced prior to commencement.

Manufacturing

Our combined facilities can handle up to 150 tonnes per week.

Our highly skilled teams have an established reputation for service, reliability and quality, with a strong emphasis on workshop safety, material traceability and workmanship.

All our work is executed in accordance with the industry standard regulations fully certified to BS EN 1090 CE Marking factory production control up to, and including Execution Class 3.

“Our experienced team of coded welders fabricate all aspects of structural steel for commercial and domestic use, including drilling, welding, cutting and finishing.”

We fabricate all steelwork to your requirements.

Special Works

Weldrite's Special Works Division was initially created to work alongside our Main Contracts Division, giving us the opportunity to offer tailored, specialist solutions to the larger, more technically complex projects. WSW also caters for individual projects, typically between 1-50 tonnes.

Weldrite Special Works allows us to draw on the group's expertise and manufacturing resources to deliver fast, cost effective interface solutions.

Clients benefit from the same level of proficiency offered through our main Contracts Division.

Through Weldrite Special Works we are able to manage all our client's secondary steel and metal work requirements in-house.

This allows us to deliver a highly competitive, inclusive package to our clients.

Weldrite Special Works can also handle the smaller more be-spoke requirements from the general building trade and private individuals.

Structural Steelwork

- Complete structural steelwork solutions from design, through to installation.
- Be it a complete steel frame building or a customised project, we are happy to help.

Steel Stairs, Balconies and Balustrading

- From fire escapes and cat ladders to bespoke concepts and design, we can assist in the design, manufacture and installation.
- Balconies.
- Balustrades.

Steel Beams, Steel Sections, Metal Works & Fabrication

- We can provide to both trade and private individuals.
- We deliver to you anywhere in the southern region.
